Market outlook

Stock market: The market advanced to the 1,130 zone before dropping sharply at the end of the session and closing at 1,115.22 points, sideways compared to yesterday. Market breadth tilted to the negative side with 7 out of 19 sectors gaining, in which Financial Services led the gain. On the other hand, the Oil and Gas sector, which gained well yesterday, dropped sharply today. Regarding the transactions of foreign investors, today they net bought on the HSX and net sold on the HNX. Market movements show that 1,130 is the current resistance level. VN-Index needs more accumulation to gain momentum to conquer this resistance. In addition, today the market received positive news: SBV continued to lower the operating interest rates by 0.5%.

Future contracts: Futures contracts fluctuated according to the movement of VN30, especially VN30F2306 decreased. It is recommended that investors trade cautiously in the coming sessions.

Covered warrants: In the trading session on June 16, 2023, covered warrants fluctuated along with the struggling movement of the underlying stocks.

Highlights:

- VN-Index **-1.75** points, closing at **1115.22**. HNX-Index **-1.09** points, closing at **228.44**.
