### VN-Index recovered

BSC's Forecast on the stock market

	Negative	Neutral	Positive
Day 2/2/2024		•	
Week 29/01/2024-02/02/2024		•	
Month 01/2024		•	

#### Market outlook

**Stock market:** VN-Index opened with a slight correction, but then quickly rebounded due to the dominance of buying power, especially in the last minutes of the morning session. With that momentum, the VN-Index continuously increased to the 1,174 point mark in the afternoon session. The index closed up 8.71 points compared to the previous session, at 1,173.02 points. Market breadth was positive with gains in all sectors. In terms of foreign trading, foreign investors were net buyers on both the HSX and HNX exchanges. However, the net buying force of foreign investors has narrowed significantly. Market liquidity in today's trading session decreased compared to the previous session. In the coming trading sessions, if the buying force is not strong enough at the 1,165-1,170 zone, the VN-Index may continue to decrease to the short-term support level of 1,150.

**Futures contracts:** Futures contracts increased following the movement of VN30. It is recommended that investors trade cautiously during the session.

**Covered warrants:** In the trading session on February 1, 2024, covered warrants fluctuated along with the recovery of the underlying stocks.
